### OS / Browser Notes:

<sup>a</sup> Compatibility Testing occurs only against the two most current versions of Windows and Apple Operating Systems (OS), and web browsers that are officially supported by EBS application vendors. Users with older software versions should refer to their local technical support area for operating system/browser/Adobe Reader upgrade information and options.

**Browser versions tested and supported for Windows 7 (all EBS Systems) are :** Internet Explorer 11, Firefox ESR 38, and Google Chrome 44.

<sup>b</sup> Preferred browser for EBS Systems. For best results, add EBS Portal to Internet Explorer's Local Intranet "Sites"; click for: ["Local Intranet" Detailed Instructions](#)

<sup>c</sup> Only the Extended Support Release (ESR) of Firefox is supported. For information and installation instructions please see Firefox ESR section here: [Browser Versions & Settings](#)

<sup>d</sup> Incognito, InPrivate and Private Browsing are not supported for SAP GUI for HTML applications when working with document uploads or downloads.

<sup>e</sup> Only IE supports Adobe Reader DC, needed to use Adobe Interactive Forms [such as 'Work Schedule Change Request', 'Application to Retire' and some "HR Forms & Cost Redistributions"]

<sup>f</sup> Constraints/incompatibilities may exist with some HR links or processes. [Click here for latest browser limitations and support information for HR/Payroll links](#)

<sup>g</sup> Safari is the only supported browser on a Mac. HR/Payroll functionality not supported by Safari requires adding a virtual Windows environment using VMware software (only).

<sup>h</sup> For pdf printing from KFS, an installed PDF Viewer (such as Adobe Reader 11 or DC) is required.

<sup>i</sup> Date Selector box on some Date fields only displays a partial calendar (last week of month not accessible/selectable). Manually enter date in this situation to continue.

<sup>j</sup> Some KFS functions may redisplay a large blank screen to the user. Scroll up the screen to locate and use navigation buttons.

<sup>k</sup> This OS/browser combination is not supported for Cognos Query Studio.

### Using this Matrix

Find your Operating System and browser, and move right across the row.

Look down a matrix column for any specific EBS application.

✓ Indicates OS/browser combination tested & supported for that EBS application.

Refer to notes (to the right of the checkmark) for additional support information.

**Browser/OS combinations listed on this page are the only ones tested and supported for EBS**

\*\* Best EBS results occur using Internet Explorer with Windows, or Safari with a Mac \*\*
