

Get the facts about critical illness insurance.

The financial consequences of surviving a critical illness are something few people are generally prepared for. Expenses that may not be covered by medical plans, such as co-pays, deductibles, childcare costs, mortgage payments, groceries and experimental treatments, could cut into your savings.

How it works

Your Critical Illness benefit may be used multiple times. This illustration is based on a **\$30,000 Initial Benefit Amount plan**.¹

Did you know?

MetLife Critical Illness Insurance covers critical illnesses, such as cancer,⁶ heart attack,² stroke³ and kidney failure.

Consider this:

After my first experience, I never would have expected to suffer a second heart attack just two years later. But one morning while teaching my class, I felt an intense shortness of breath and pain in my jaw. Luckily, the school nurse called 911. First, I had to focus on getting better. The last thing I needed to worry about was finances. **Critical Illness Insurance** was there again to help pay for things medical insurance didn't cover, like specialist co-pays and help around the house, while I recovered.**
