Saving even 1% more of your pay can add up.

That's just over \$40 per month for a \$50,000 salary.

Saving about \$5 a day over the years (Just \$150 a month)

The above illustration is intended to show a hypothetical example of the principle of compounding. The example doesn't include the impact of any investment fees, expenses, or taxes that would be associated with an actual investment. If such costs had been taken into account, the results shown would have been different. Not intended to represent the past or future performance of any investment. Assumes contributions are made monthly at a 6% annual effective rate, compounded monthly. Actual performance will vary with market conditions.
